1. General

For the use of ALVARA Interactive Cash Control (ICC) ALVARA Digital Solutions GmbH provides support under the system requirements listed below. Deviations from the stated conditions are not approved. Use is then at your own risk and technical support is not covered by an existing usage agreement.

Should you require assistance in selecting the appropriate system requirements, please contact the employees of ALVARA Digital Solutions GmbH.

2. Supported Web Browsers

Please note that future versions of ALVARA ICC may list different versions. For reasons of security, compatibility and speed, we always recommend using current versions.

- Microsoft Edge
- Mozilla Firefox (ab 40.0)
- Google Chrome (ab 50.0)

3. Screen Resolution

The workstation must have a screen resolution of at least 1280x1024.

4. Necessary Permissions

The workstation must have a compatible web browser as well as internet access. Any firewalls must allow access to the following URL:

<https://icc.alvara.de>

The following permissions/extensions must be enabled in order to use the web portal:

- ActiveX (Internet Explorer)
- JavaScript
- Cookies

5. Operating Systems ICC Vault App

To use the ICC Vault App, a mobile device is required that uses the following operating systems:

- **iOS:** at least **iOS 15**
- **Android:** at least **Android 7 (Nougat)**

6. Required Permissions

- **Access to the camera**

Required for scanning QR codes and registering the device. This is also described in the documentation for registering the ICC Vault App.

7. Approved Cash Scales

The ICC Vault App currently supports the following cash scale:

- Cashmaster One
